

Rebilda DC

Dual-curing flowable adhesive core build-up system

Indications

Adhesive core build-up on vital and non-vital teeth

Advantages

- Light-curing for time-saving application
- Additional chemical curing for safe polymerization
- Available in 10 g QuickMix syringes and 50 g cartridge
- In three shades: blue for easy identification of preparation margins, dentine for aesthetic reasons, white as an aesthetic contrast to dentine
- Low heat development even in bulk application
- Flowable – packing is obsolete
- Safe adhesion with system bond – fewer parapulpal pins
- Optimized small mixing tips save material
- Easy access of posterior areas with intraoral tips

Presentation

Art.-No. 1395	intro set: 50 g cartridge dentine shade, 8 ml Futurabond DC, mixing tips type 12, dispenser type 3, intraoral tips type 3, accessories
Art.-No. 1395	pack 50 g cartridge Rebilda DC dentine shade, mixing tips type 12, intraoral tips type 3
Art.-No. 1397	pack 50 g cartridge Rebilda DC blue shade, mixing tips type 12, intraoral tips type 3
Art.-No. 1398	pack 50 g cartridge Rebilda DC white shade, mixing tips type 12, intraoral tips type 3
