

Solobond Plus

Light-curing universal dentine/
enamel bonding agent

Indications

Direct restoration with composite restoratives for all cavity classes
Adhesive luting of crowns, bridges, inlays, onlays and veneers with resin cements
For light-curing and self-curing composites

Advantages

- Quick and time-saving application
- Can be used with or without dentine etching
- Two-component system optimized for dentine and enamel
- »Stick-immediately-effect« for simple application and modelling
- Universal for all restoratives
